RENEWABLES | RELATED SERVICES

THE POWER OF QUANTA

Quanta Canada Services Companies are founded, crewed, and led by Canadians, for Canadians. We work with our other sister-companies across Canada and the USA to seamlessly produce turnkey solutions for our clients.

Through a single contract and point of contact, we can, collectively, put together a full services team to successfully deliver every aspect of a power project.

OUR SAFETY APPROACH

Valard utilizes the world class Quanta Services Capacity Model™ approach for HSSE. It was developed in conjunction with workers and industry-leading experts as a bold and different way to approach workplace safety.

The Capacity Model™ demands that we honestly assess reality so that successes don't happen by chance and that failures, when they occur, conform to one simple and consuming goal: *zero life-threatening, life-altering, or life-ending events.*
